437-477-9680 | moaz.aamir@torontomu.ca | LinkedIn

EDUCATION

Toronto Metropolitan University **Toronto, ON**
Bachelor of Engineering, Honors / Co-op *(Specialization in Computer Engineering)* Expected Graduation: Apr. 2029
Relevant Coursework: Electric Networks, Object Oriented Eng. Analysis & Design, Electronic Circuits, Embedded Systems, Digital Systems & Logic Design

EXPERIENCE

Stylus Marketing **Oakville, ON**
Software Engineer Intern May. 2025 – Aug. 2025

- Automated internal workflows with **Python**, improving operational efficiency by **40–50%**
- Built data pipelines and centralized databases for client metrics and reporting
- Developed **Python** and **Excel** dashboards for operational tracking and analysis
- Documented system architecture, workflows, and implementation requirements

0.5 Labs **Toronto, ON**
Software Engineer Intern Sept. 2025 – Dec. 2025

- Built full-stack applications with **React.js** and **Python**, reducing manual work by **60%**
- Engineered real-time **data synchronization APIs**, reducing reporting delays by **70%**
- Built data pipelines with **Python**, **Pandas**, **SQL**, and third-party APIs
- Integrated reusable frontend components with backend services and APIs

Vision Allies **Toronto, ON**
Software Engineer Intern Mar. 2026 – May. 2026

- Built dashboard features with **React.js**, **TypeScript**, and **Material UI**
- Integrated frontend components with **REST APIs** and **JSON** data flows
- Optimized frontend architecture and state-driven functionality
- Developed reusable UI components for scalable SaaS development

Applied Optimal **Lethbridge, AB**
Software Engineer Intern May. 2026 – Jul. 2026

- Built full-stack club management features using **Flutter**, **FastAPI**, **Supabase**, and **PostgreSQL**
- Engineered **RBAC** with **Python** permissions, PostgreSQL, **RLS**, and Flutter route guards
- Built **REST APIs** for membership and registration flows with authorization and **Stripe** Checkout
- Designed PostgreSQL schemas and SQL migrations for memberships, categories, interests, and settings

VENTURES, PROJECTS AND ADDITIONAL EXPERIENCES

Orbit Flips (~600 users) | React,js, Python, Firebase, REST APIs, SQL, HTML, CSS
Co-Founder, Lead Engineer & Software Developer Aug. 2021 – Jul. 2022

- Developed a full-stack Web 3.0 community platform serving 600+ active users at peak, designed backend services, database structures, and a responsive UI while integrating external cryptocurrency market APIs for real-time data
- Built automated data processing systems using **Python** and **Firebase** to aggregate, validate, and structure live market information into analytics dashboards and educational modules, supporting **$500K+** in user transaction activity

MarketPilot AI | React.js, Python, Firebase, Chart.js, Random Forest

- Built and deployed a full-stack trading platform using **React.js** and **Python**, implementing RESTful APIs and real-time data to enable live stock tracking and trading along with trade execution for users
- Engineered dynamic financial visualization tools using **Chart.js** and integrated **Firebase** for seamless real-time database synchronization, while optimizing system performance through 24-hour predictive caching, lazy loading, and responsive UI
- Designed and implemented a **random forest** machine learning model leveraging 25+ market indicators to generate 1-year price forecasts, applying feature selection, model validation, and performance evaluation techniques

ADDITIONAL INFORMATION

Technical Skills: MATLAB, Python (NumPy, Pandas), C, C++, Java, Verilog, SQL, React.js, TypeScript, Supabase
Tools: Git, Docker, Linux, Quartus, ModelSim, LTspice, Microsoft Excel, Word, PowerPoint, Outlook
Interests: Soccer, Boxing, Basketball, MMA, Weight-Training, Movies & TV (Fantasy, Thriller), Music (Hip-Hop, Rock, R&B)
